

FE

Back Performance FE

Back Performance with Premium Foam Encasement.

This support mattress features the advanced, progressive-rate, zoned Back Performance® coil design paired with a foam encasement to deliver incredible support, a great seating edge and enduring stability, while eliminating edge roll-off. Interconnected spring rows and helical wires sewn head-to-foot assure balanced support and minimize motion transfer and partner disturbance.

MX GEL

Back Performance MX Gel

Back Performance support with Cooling Gel Memory Foams.

The introduction of gel beads to Back Performance® high-density memory foam adds extra layers of support, pressure relief and temperature control to the mattress. Gel, a known performance product for individuals with active lifestyles, increases support for the body while maintaining the utmost comfort.

PS

Back Performance PS

All the support features of the Back Performance model plus Pocket Spring technology.

800 tempered-steel coils encased in individual pockets of high-quality, high-density fabric deliver long-lasting pressure relief that conforms to the individual contours of your body. The coils are pre-loaded for enhanced resilience and are arranged in strands running head-to-toe for reduced motion transfer and partner disturbance. The advanced foam-encased edge design also yields 20% more sleeping surface and greater overall stability and comfort.

Support Your Active Lifestyle.®

Which is more important to a good night's sleep, comfort or support? Don't worry, we won't make you choose.

Naturally cool.
Every Back Performance mattress is wrapped in a luxurious knit, all-natural FR rayon fiber and/or silk/wool blend.

Cooling Gel Memory Foam.
Breathable layers of Cooling Gel Memory Foam INCREASE SUPPORT for the body while maintaining the utmost level of comfort and a cool sleeping temperature.

The Back Performance® collection reflects our belief that a balanced combination of comfort and support delivers the optimum sleep system for an active lifestyle. Advanced coil technologies provide proper posture alignment for a healthy spine while layers of premium zoned foam and memory foam respond to the body with pressure-relieving comfort for deep, restorative sleep.

Personalized comfort.
Our Ergonomic 5 Zone support with high density Memory Foam adjusts to individual body weight and molds to your unique shape to alleviate pressure points that cause tossing and turning. Back Performance helps ensure deep, restful sleep, night after night.

Support that lasts.
The secret of Back Performance's durable support lies in the combination of ergonomic coils that respond to every movement and the German-design encasement that adds the stability of high-density foam support. The result is 20% more sleeping area. And because Back Performance is made with advanced coil technologies, it will retain its shape and integrity longer than other innerspring systems.
